

COMPREHENSIVE STUDENT JOURNEY & STATUS DEFINITION

Digital Research Information Management System

Overview

This document outlines the end-to-end student lifecycle within the DRIMS platform, merging procedural steps with technical status definitions. The workflow tracks a student from initial admission through research, examination, and final graduation. Below is an image of all the status as depicted in DRIMS:

Sequential Status Step Order

Step	System Status	Responsibility & Key Actions
01	admitted	ResearchAdmin (Centre) inserts students into the system to begin the lifecycle.
02	workshop	Immediate update following admission; duration is typically 2 weeks.
03	normal progress	Triggered once a supervisor is allocated; expected duration of 4 months.
04	proposal received	SchoolAdmin updates status upon receipt of the student's proposal.
05	proposal in review	Reviewers assigned; standard review window is 2 weeks.
06	passed-proposal review finished	Schooladmin confirms review completion based on received feedback.
07	waiting for proposal defense	Student is scheduled for defense after the review is finalized.

Step	System Status	Responsibility & Key Actions
08	passed-proposal graded	Auto-updated status following a successful defense and mark entry.
09	compliance report submitted	Student submits the revised proposal and accompanying compliance report.
10	letter to ethics committee issued	Prerequisite clearance obtained before proceeding to field research.
11	letter to field issued	School Admin updates status to authorize the start of fieldwork.
12	fieldwork	Active research phase with an expected duration of 4 months.
13	dissertation submitted	Research Admin updates status when the examination book is received.
14	under examination	Internal and External examiners conduct reviews (approx. 2 weeks each).
15	passed & authorized for viva	System auto-updates once passing marks (> 60%) are recorded and averaged.
16	scheduled for viva	Details (date, panelists) are inserted by the Research Admin.
17	Accepted viva date	System confirms the student has accepted the proposed defense date.
18	minutes pending	Following a successful viva verdict; duration is 1 week.
19	minutes sent	Minutes are formally dispatched to the student via SMS/Email.
20	final dissertation & compliance report received	Centre Admin verifies receipt of the final corrected documentation.
21	results approved	Official validation of the student's marks and final outcome.
22	results sent to schools	

Step	System Status	Responsibility & Key Actions
		Results are distributed from the Centre to specific academic departments.
23	results approved by senate	Final academic governing body approval is logged.
24	graduated	Process completion; student is marked as completed.

3. Automated Notifications

Escalation Protocols

- **Supervisor Allocation:** Query System triggers alerts to ResearchAdmin if no supervisor is assigned after 2 weeks.
- **Proposal Delays:** System alerts students if the proposal is not received within the 4-month window.
- **Reviewer Assignment:** Alerts SchoolAdmin if reviewers are not assigned within 2 weeks of submission.
- **Examination Follow-up:** Alerts are sent to examiners if reports are pending beyond the 2-week limit.

4. Technical Configuration

Each status includes specific metadata for system logic, as defined in the configuration database:

- **Workshop:** Expected *14 days*, notifies Manager & ResearchAdmin.
- **Normal Progress:** Expected *122 days*, notifies Student.
- **Fieldwork:** Expected *122 days*, notifies Student.
- **Minutes Pending:** Expected *7 days*, notifies ResearchAdmin.
