Introduction

This document outlines the required details needed to register users for different roles within the DRIMS system. When requesting data from individuals to be added to the system, please refer to the specific role below to ensure all necessary information is collected.

Purpose:

Define standardized data requirements, schemas, and role-based attributes for all users within DRIMS.

Scope:

This document covers:

- Core user identity
- Role-based users
- Structure for users metadata

Role Definitions

2.1 Types of User

2.1.0 Active Users (or Authenticated Users)

These are users with system credentials who can log in and directly interact with the DRIMS platform through a defined interface (e.g., Research Center portal, Student portal, etc). They perform actions, initiate research-based workflows, and are subject to role-based access control (RBAC).

Active users include:

1. Administrative Users (School administrators, Managers, IT team, etc.)
2. Supervisor
3. Student
4. Faculty Members

2.1.1 Passive Users (or Non-Authenticated Entities)

Entities that exist within the system as records but do not have login credentials or direct system access. They are referenced, assigned, or interacted with indirectly through Active Users or system processes.

Active users include:

1. Examiner
2. External Reviewer
3. Stakeholder (non-system participant)
